COLUMN E500 MAXI EVOLUTION

COD: 07200

MIN VESA 200x200 - MAX VESA 800x600

COLUMN E500 MAXI is an electric lift column designed to support displays up to 90".
The structure rests on the floor and is secured to the wall using a dedicated mounting bracket, ensuring maximum stability and safety. It is suitable for installation on both concrete and plasterboard walls. The electric height adjustment provides a 500 mm travel range, allowing the display position to be easily adapted to different viewing and operational requirements. In addition, if greater height is needed, the display position can be further increased by up to 240 mm. This feature makes the screen even more visible in large environments such as meeting rooms, classrooms, and conference spaces, ensuring optimal viewing conditions even for audiences seated farther away.
