TARGETED TO PROFESSIONALS

Leggio Slim

COD: 19285

VESA 100X100 / 200X200

LEGGIO SLIM is a compact digital signage kiosk designed for wayfinding, information lookup, and visitor guidance in public and commercial environments. Designed to accommodate displays up to 32", it is the ideal solution when a large-format screen is not required.

The display is mounted at a fixed 45° angle, providing excellent ergonomics and an intuitive viewing experience. Its clean, modern design features internal cable management through the supporting column, ensuring a neat, uncluttered, and professional installation.

Thanks to its compact footprint and minimalist aesthetics, LEGGIO SLIM integrates seamlessly into airports, railway stations, museums, offices, exhibition spaces, and other public venues.
