TARGETED TO PROFESSIONALS

Sigma

VESA: 100x100 – 200x200

SIGMA is a multimedia kiosk designed to accommodate 24" to 32" touchscreen displays, making it ideal for information points, hospitality venues, museums, public institutions, and any environment where digital content consultation is required. Its distinctive feature is the slightly inclined display, specifically designed to provide a more ergonomic and comfortable user experience than traditional vertical kiosks, making interaction more intuitive and improving content readability.

Finished as standard in elegant Black RAL 9005, SIGMA can be customized in any RAL color to perfectly match the visual identity of its installation environment.

To further enhance its functionality, SIGMA can be equipped with integrated brochure holders, allowing digital communication to be complemented with printed materials such as maps, tourist guides, catalogs, or promotional leaflets.
