

COLUMN E700 with Anti-Collision Sensor
PROFESSIONAL DISPLAY SUPPORT

COLUMN E700 is a motorized wall/floor support for large screens and touch screens up to 100" and 150Kg.

It comes standard with the anti-collision system to ensure maximum safety during its operation.

The 700 mm stroke allows you to position the screen from a minimum of 1159 mm to a maximum of 1859 mm (measured at the center of the screen). By combining COLUMN E700 with the Base (code 07182), the solution becomes self-supporting (without the need for wall fixing).

For Wall/Floor application it is mandatory to purchase the wall fixing system (code 07180 or 07181).
