

# dvLED WALL MOUNTS CURVED

## PROFESSIONAL DISPLAY SUPPORT

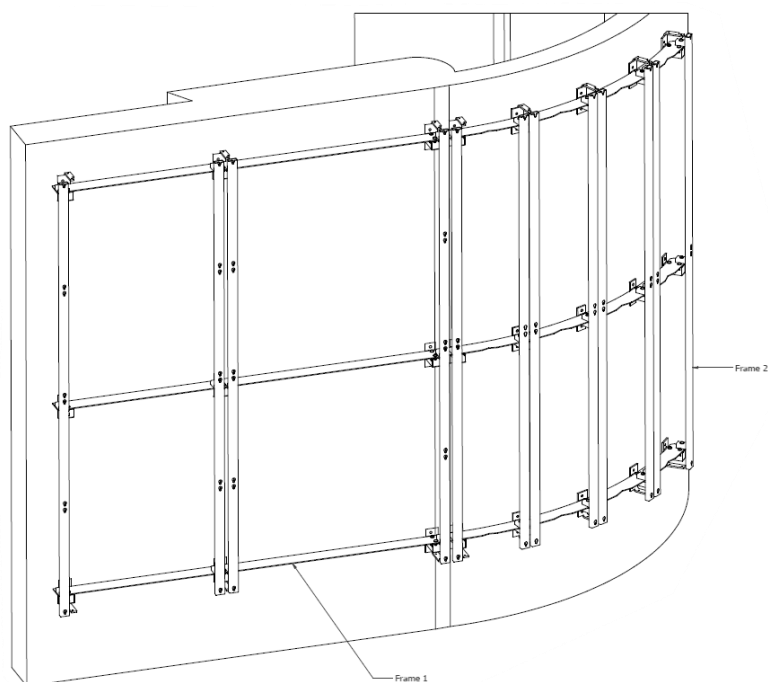

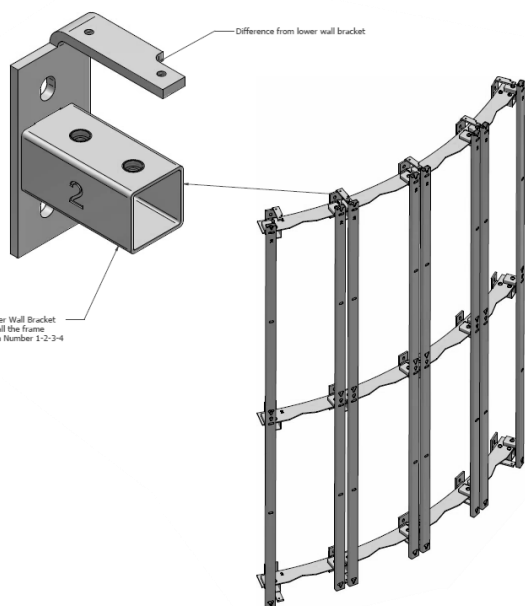

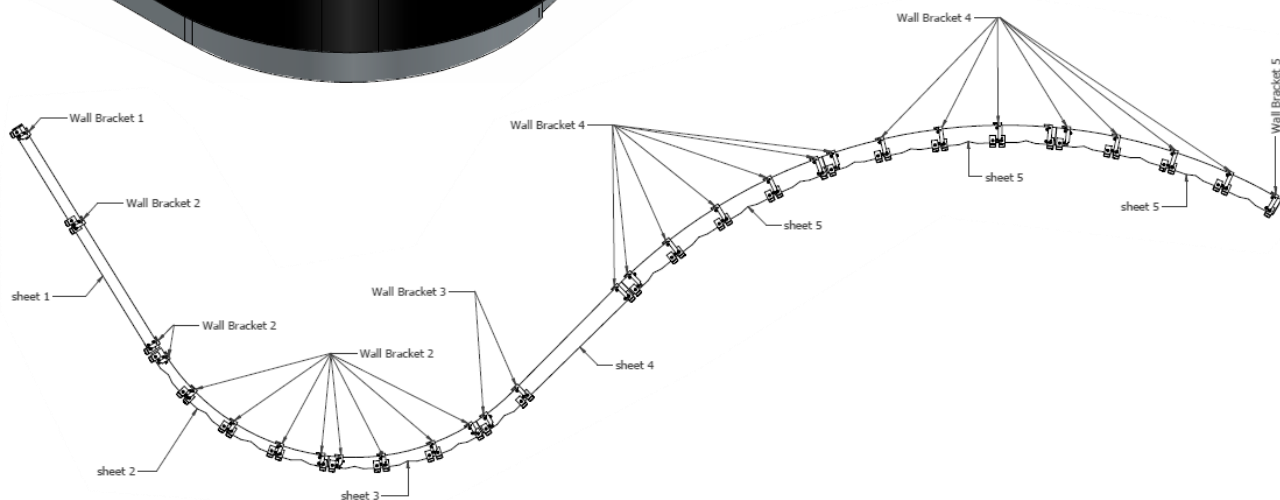

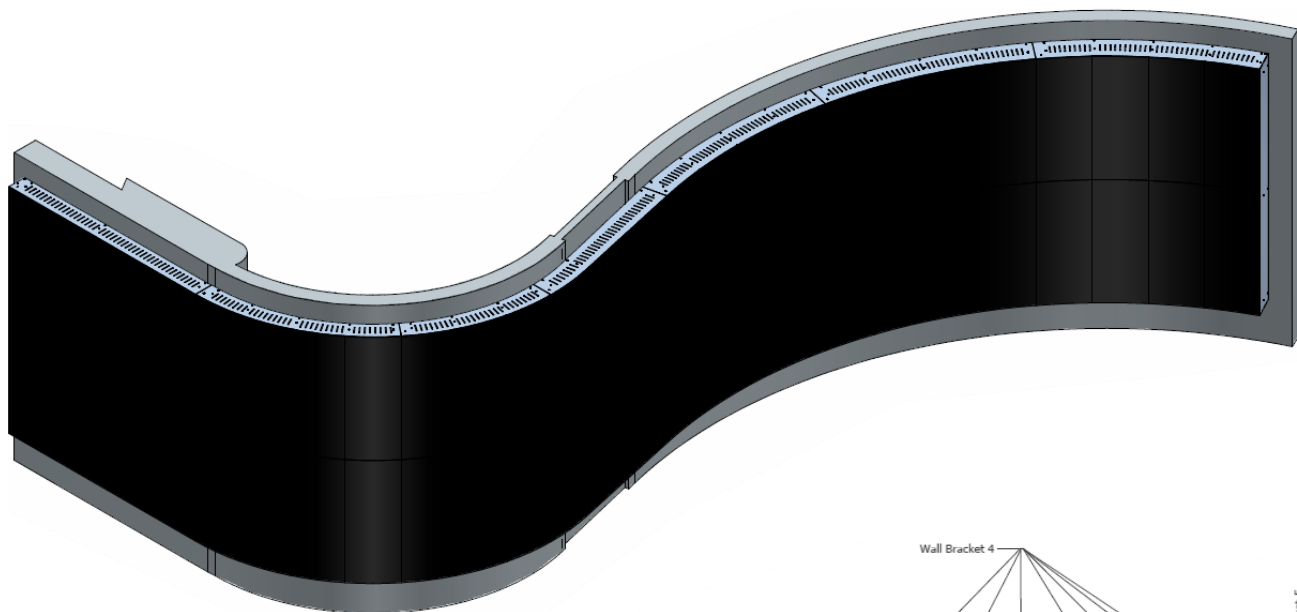

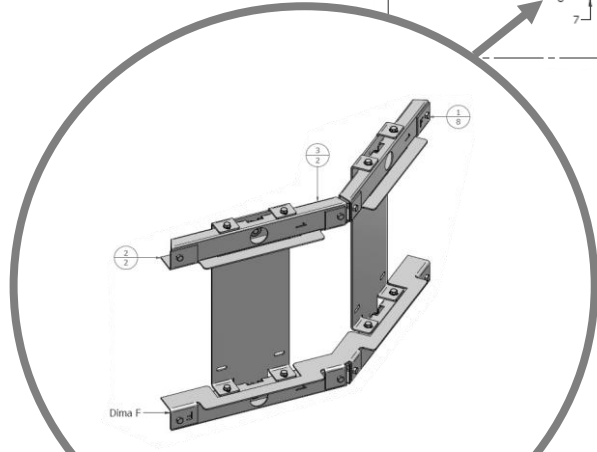

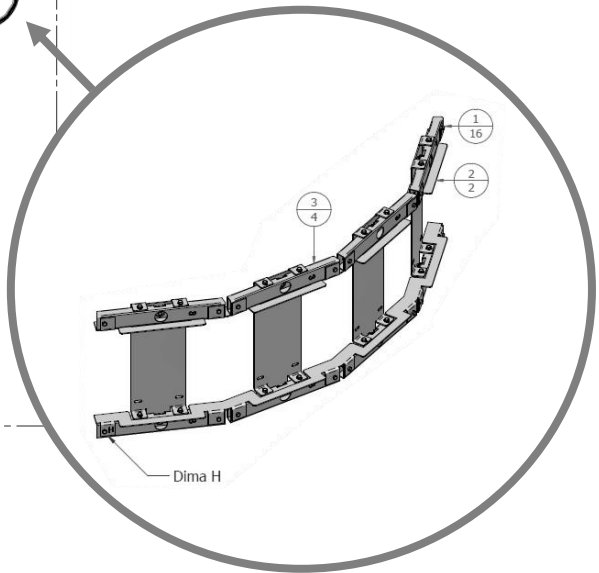

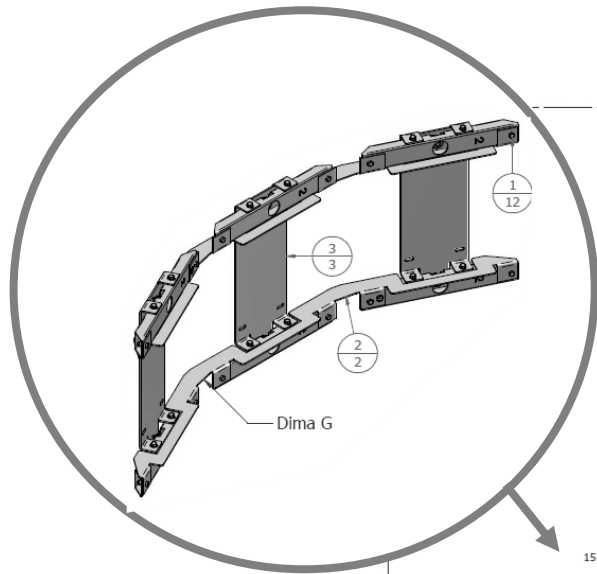

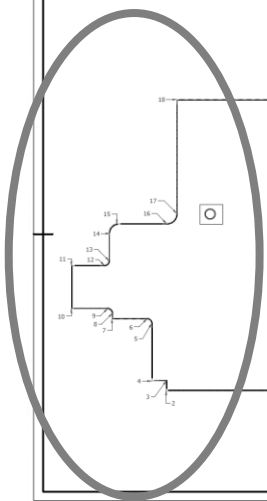

OMB has special skills in the development and production of LED mounting structures for curved walls.

Doesn't matter if the wall is concave or convex or a mix of these, OMB will find the right installation solution.

The structures are customized based on the total size and the individual LED tile.

These complex structures are made up of many components, but our assembly instructions will guide you step by step for correct installation.

When the complexity of the structure is too high,  
OMB can offer the pre-assembled structure
